Summary

Associate Software Engineer at Epsilon with 1+ year of experience in Database and Gen AI .I am a B.Tech IT graduate with strong execution in Software Engineering, Databases, Gen AI, and AI/ML. Experienced in Python, Java, C++, .NET and MySQL, with hands-on projects in GenAI (AWS Lex, Bedrock). Skilled in automation using UI Path , Power Automate , MS Teams. Certified by AWS, Google, and Cisco, passionate about building intelligent, secure, and scalable solutions.

Education

Christ University , Bangalore

Bachelor of Technology in Information Technology with Honors in AI/ML

June 2021 – June 2025

GPA – 3.2 out of 4

Nashik Cambridge School , Nashik

Higher Secondary Education

April 2019 – May 2021

Skills

Programming Language: Python, SQL , Java, C, C#, C++, Bash/Shell

Technologies & Tools: MySQL, UI Path , Power Automate TensorFlow, Scikit-learn, Pandas, NumPy, Transformers, Matplotlib, Docker, Kubernetes, n8n, Wireshark, GitHub, AWS (EC2, S3, CloudFront, Lambda), Linux, Automation scripts, Computer Networks, Operating Systems, Data Structures and Algorithms, Model Evaluation, Cloud Monitoring.

Web & Databases: HTML, Database Management Systems

Experience

Associate Software Engineer at Epsilon

February 2025 - Present

- Managing and Developing Database Queries for a specific client working side by side Project team and Client Team.
- Built 14 snaplogic pipelines for the client from Development to UAT which handles various scheduled jobs .
- Proficient in implementing Gen AI and Amazon Q alongside Microsoft Teams , Excel and Canva

IT Intern – *Cochin Shipyard Ltd*

April 2024 – June 2024

- Developed automation jobs to read and analyze 300 Ship purchase invoices in around 30 mins using UI Path and Gen AI.
- Collaborated in development meetings, contributing to effective, solution-oriented brainstorming sessions.

Projects

Medicare Assistant using Gen AI and Amazon Q (Bedrock) at Epsilon

July 2025

- Built a Medicare Assistant using Amazon Q and Gen AI with the help of AWS tech stacks such as Bedrock , Lambda , S3 etc
- Used effective coding and prompts to test and analyze the Assistant with the capability of Json file .

Malware Analysis using Machine learning for Vehicle Insurance Frauds

February 2025

- Data prep: Use Kaggle vehicle insurance datasets; engineer features like claim frequency, age, vehicle type.
- Modelling: Train Logistic Regression, RF, XGBoost; evaluate with AUC, F1-score, confusion matrix.
- Handle imbalance: Oversample fraud cases with SMOTE. Deploy Web app (Flask) for claim uploads and predictions.

Language Translator App using Android Studio (Java) for specially abled students.

March 2024

- Project Setup: Create Android Studio project with Java (min SDK 21), integrate Google ML Kit Translation dependency, and design accessible UI (large fonts, spinners for languages, input/output fields).
- Core Translation Logic: Configure TranslatorOptions for source/target languages, download models for offline use, implement translation via translator.translate(text) with success/failure listeners.
- Enhance & Deploy: Add Text-to-Speech, SpeechRecognizer for voice input, accessibility features (TalkBack, vibrations), test on devices/emulators, and build APK for specially abled students .

Certifications

- AWS Cloud Practitioner (Learner Badge)
- Coursera Cybersecurity Professional Course (2 Certificates)
- Cisco Networking Essentials

Extracurricular

- Student Head of INDUSTRY INSTITUTE INTERACTION CELL (IIIC) , CHRIST University Kengeri Campus (Responsible to bring in Companies and Bridge the gap between Students and Academia .)
- Club Coordinator , ASCII , Department of Computer Science and Engineering (Responsible for Departments Events)
- Centre for Social Action volunteer (responsible for Social Welfare Actions) (3 years)
